

NEW PRODUCT

GPS/GSM STEALTH VEHICLE TRACKER

The Stealth Tracker from DGPS 4U Ltd is one of the best value for money solutions for real-time web based tracking and the recording of vehicle and plant movements.

With an inbuilt GSM/GPS module* this unit can understand instructions and contact you via SMS/call with alerts or requests. You can then take immediate direct action or log onto a server and track the vehicle using GPRS services.

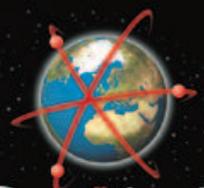

Compact in size, with an inbuilt battery the waterproof and dustproof Stealth Tracker is easy to fit and use. With low maintenance, even the firmware upgrades are all carried out by wireless, so it is a product to fit and forget.

An excellent purchase if you simply want to follow and log vehicles, or be in control of remote plant with security issues!

* Dual or Quad band GSM 900/1800Mhz (850/1900 optional)
