VFLEX GUIDANCE

The V-Flex Guidance system is a DGPS 4U replacement for the Sirio light bar. The V-Flex system is a low cost upgradeable guidance system that uses the latest technology for the agricultural market and is based on a 7" full colour touch screen display that is easy to see in daylight. V-Flex now comes with the new V-Smart antenna system, this development by DGPS 4U has the GPS and Hill side compensator with radar output and PPS all fitted inside the antenna housing - you now only have the display in the cab. Auto-steer can now be specified as an upgrade.

Features and functions

- ▶ Record every job including coverage area, start date and end date.
- ▶ Stores field boundaries against farm and field names.
- ▶ Optional automatic shut off for selected. fertiliser spreaders.
- ▶ Automatic field recognition.
- ▶ Building hillside compensator. ▶ Easy to install.
- ▶ Low cost system. ▶ Upgradeable.
